

## **Theme changes**

You may have noticed that the theme of this site keeps changing (or not, there aren't that many of you that visit). I thought I had found one I liked... until it started inserting ads on my site.

It wouldn't be so bad, but when the ads are for causes I simply cannot support? Away with the ads and away with the old theme.

[Update] The old theme was free, as is the one I'm using now. The ads came as a surprise and did not bring me any revenue.
